

Milo's Plumbing - Website Changes Report

Student Number: ST10517538

GABRIEL MOTSWI

WEDE520 PART 2

Home.html

- **Hero section:** The `<main>` tag was replaced with a proper `<section class='hero'>`. The heading is no longer underlined (removed `<u>` tag). The `h2` was changed to a `<p>` tag for correct semantics.
- **Request a Quote button:** The href was fixed from `'/contact'` (broken) to `'Contact.html'`.
- **Buttons styled:** The two CTA buttons now use `class='btn-primary'` and `class='btn-secondary'` defined in the CSS file.
- **New services section:** Three new feature cards were added below the hero: Expert Technicians, Quality Work, and 24/7 Service. These did not exist in the old version.
- **Footer:** Changed from `<footer>©ST10517538</footer>` to a styled footer with the text in a `<p>` tag.

About Us Page (AboutUs.html)

- **File renamed:** From `'About Us page.html'` to `'AboutUs.html'`.
- **Title fixed:** Was incorrectly `'Abous Us'` - corrected to `'About Us - Milo's Plumbing'`.
- **Logo removed from top:** The old version had a standalone logo image sitting above the header outside any section. This was removed.
- **Hero section added:** A new `<section class='about-hero'>` was added with a heading and subtitle.
- **Content restructured:** The old version used a single section with inline div styles. The new version uses three separate `.about-card` divs: Our Story, Our Mission (renamed from Our Values), and Certified & Trusted.
- **Our Story updated:** Fixed typo `'fasr'` to `'fast'`. Location changed from `'Randburg'` to `'America and surrounding areas'`. Extra paragraph about emergency services added.
- **Certified section:** Fixed typos `'Inusred'` to `'Insured'` and `'Gaurantee'` to `'Guarantee'`. Added `'Same-Day Emergency Service'` as a new list item. Added checkmark symbols to each item.
- **Footer added:** The old version had no footer at all. A footer with phone number and copyright was added.

Services.html

- **Section restructured:** The old inline `<div style='display:flex'>` wrapper was replaced with `<section class='hero'>` containing a `<div class='service-container'>`.
- **Heading corrected:** Changed from `h2 'Our Plumbing Service'` to `h1 'Our Plumbing Services'` (plural, correct heading level).
- **Service cards:** Replaced inline-styled divs with `<div class='service-card'>` cards styled via the external CSS file.
- **Typos fixed:** `'repars'` corrected to `'repairs'`, `'maintanance'` corrected to `'maintenance'` (appeared twice), `'its'` corrected to `'it's'`.
- **CSS transition bug fixed:** Old code had `'transition: transform 0,3s'` (comma instead of dot). This is now handled correctly through the CSS class.

- **Footer added:** A new `<footer class='footer'>` with phone number and copyright was added (old version had none).

Reviews.html

- **Title fixed:** The old Reviews page had the title set to 'About Us' (completely wrong). Fixed to 'Reviews - Milo's Plumbing'.
- **Hero band added:** A new `<div class='hero-band'>` section with a 'Customer Reviews' heading was added at the top.
- **Review cards replaced:** Old version had 3 cards that simply displayed Review1.png, Review2.png, Review3.png images with labels 'Review 1', 'Review 2', 'Review 3'. New version has 6 fully written text-based review cards.
- **New card structure:** Each card now includes a 5-star rating, a quoted review paragraph, reviewer initials avatar, and reviewer name with customer type (e.g. Homeowner, Verified Customer).
- **Review count:** Expanded from 3 reviews to 6 reviews.
- **Typo fixed:** 'plumbing' corrected to 'plumbing' in the subtitle text.
- **Unclosed tags fixed:** The old version had incorrectly nested/unclosed div tags. The new version has proper HTML structure.
- **Footer added:** A styled footer band was added with business name, phone link, and copyright.

Contact.html

- **Contact hero added:** A new `<section class='contact-hero'>` section was added at the top with the logo, heading and subtitle (not present in old version).
- **Layout redesigned:** The old version had a basic unstyled form sitting directly in `<main>`. The new version uses a two-column grid layout with a booking form on the left and map/location info on the right.
- **Form fixed:** The old form had broken HTML attributes (e.g. 'name and surname' used as an attribute name, and the city field was duplicated for 'Type of service'). All input name attributes are now correctly written.
- **Message field added:** A `<textarea>` field for describing the plumbing issue was added (did not exist before).
- **Submit button added:** The old form had no submit button. A styled 'Submit Request' button was added.
- **Clear buttons removed:** Each field had its own 'Clear' reset button. These were removed in favour of a cleaner single-form layout.
- **Placeholder text added:** All inputs now have descriptive placeholder text (e.g. 'e.g. Leak repair, Drain cleaning').
- **Map updated:** Map embed URL was updated to a cleaner version. Map width changed from fixed 600px to 100% to fit the card layout.
- **Contact info added:** Phone number and business hours (Mon-Sun, 7AM - 7PM | 24/7 Emergency) were added below the map with emoji labels.
